

aquila biolabs GmbH is a German sensor technology developer of smart sensors and state-of-the-art data analytics software for bioprocessing applications. As a subsidiary of the life sciences tool provider Scientific Industries, Inc., aquila biolabs aims to take the guesswork out of bioprocessing and pioneers digitally simplified bioprocessing by providing actionable insights from lab to production floor.

We currently have a vacancy for a

UI / UX Designer (F/M/D)

in our Software Development team.

During your work as UI / UX designer at aquila biolabs, you will i.a.

- conceptualize and design user interfaces for desktop and mobile web applications
- improve the user experience, user interface and visual design,
- collaborate closely with the product owner and developers to take your designs from a concept to a final product
- create flows, wireframes, design mockups and prototypes.

Your skills should include:

- professional experience in UX/UI design, with attention to detail throughout all of your work
- experience with agile development and working in cross-discipline teams
- excellent communication skills in English and German
- analytical and solution-oriented thinking and mindset,
- ability to work and learn autonomously and efficiently,

You should have profound experience in the area of UI / UX design with a strong focus to web applications. Bachelor graduates as well as persons from other fields with strong UI / UX background are encouraged to apply for this vacancy too.

Interested persons may send their full applications to **david.frank@aquila-biolabs.de** , including CV, graduation certificates, performance records and, if available, publication abstracts as well as job or project references. A letter of application is not required.
