

aquila biolabs GmbH is a German sensor technology developer of smart sensors and state-of-the-art data analytics software for bioprocessing applications. As a subsidiary of the life sciences tool provider Scientific Industries, Inc., aquila biolabs aims to take the guesswork out of bioprocessing and pioneers digitally simplified bioprocessing by providing actionable insights from lab to production floor.

We currently have a vacancy for a

Senior Full Stack Developer (F/M/D)

in our Software Development Team.

During your work as Senior Software Developer at aquila biolabs, you will i.a.

- conceptualize and develop backend services and REST-APIs
- conceptualize and develop the frontend of a web-based application
- provide technical guidance and mentorship within our software development team.

Your skills should include:

- in-depth knowledge of Java with min. 5 years of professional experience
- in-depth knowledge of, Angular, HTML, CSS and TS/JS with min. 5 years of professional experience
- the ability to work out concepts independently and to guide a team during implementation
- the ability to quickly analyze and understand electronic device schematics, datasheets and APIs
- solution-oriented thinking combined with the ability to work and learn autonomously and efficiently,
- the ability and deep interest to work and perform development interdisciplinarily.

You should hold a scientific or engineering Bachelor's or Master's degree, in the fields of software engineering or computer science. Extensive professional experience in the field of software development is a prerequisite for your application.

In addition to your salary, we offer you **individual training opportunities**, a daily meal allowance via **Lunchit**, tax-free benefits in kind via **Spendit** and a significantly expanded employer participation in the **company pension plan**. Become part of a young, motivated team in a growing biotech company. We look forward to meeting you in person.

Interested persons may send their full applications to **career@aquila-biolabs.de**, including CV, graduation certificates, performance records and, if available, publication abstracts as well as job or project references. A letter of application is not required.
